FOR SIGHT AND SAFETY

Vision aids and safety systems for  
commercial vehicle operators

# See beyond the limits

Traditional flat glass mirrors are simply too limiting to show the driver the full extent of their working environment so SPILLARD has developed key 'fit and forget' solutions to eliminate the problem of blind spots by naturally enhancing the operators visibility. Installing couldn't be simpler as they have a huge margin of error.

Optronics® mobile CCTV systems are designed, manufactured and installed exclusively by Spillard Safety Systems and are available in a range of options to meet your varied requirements and have been supplied as part of the All Round Vision package since 1994.

# Visibly better, clearly safer

# Sound judgement for safer reversing

Object Detection systems effective in extreme weather conditions such as rain, snow and sleet and also gives the operator the reassurance that even multiple objects are detected 100% of the time.

Providing mobile safety solutions that reduce incidents and increase awareness to the construction, aggregate, extraction, demolition and waste industries for over 20 years.

# Spillard – Experience you can depend on

At SPILLARD SAFETY SYSTEMS we are committed to providing our customers with the highest levels of service. This commitment and attention to detail, along with our continuous improvement policy, has earned our products acknowledgement by the HSE as well as numerous awards and commendations from industry.

Our range of solutions assist our customers in making work equipment and site vehicles as safe as possible for not only operators but also site operatives.

Every item supplied is carefully developed using best available technologies, it's stringently tested, fully guaranteed and customised to the specific needs of the application.

Together with the piece of mind that it's fully backed by the expertise of people who know the industry inside out – from Specification and Installation right through to After Care and Service.
